

NAPLEX Reinstated in all Prometric Testing Centers, Effective October 5, 2007

NABP is pleased to announce that the North American Pharmacist Licensure Examination™ (NAPLEX®) program is being reinstated in all Prometric testing centers, effective October 5, 2007. Candidates who have been deemed eligible for the NAPLEX by their respective state boards of pharmacy will have the option of scheduling an appointment to sit for the examination from October 5 forward. Prometric's customer service department began accepting calls from candidates for examination appointments and rescheduling of appointments on October 1. If a candidate has an existing appointment, either selected before the suspension of the NAPLEX or rescheduled by Prometric during the suspension, it will be the candidate's responsibility to reschedule that appointment if the candidate desires an earlier appointment date and time. NABP cautiously estimates that reinstatement of the Georgia Multistate Pharmacy Jurisprudence Examination® (MPJE®) will occur in late November or early December.

The National Association of Boards of Pharmacy (NABP) is the independent, international, and impartial association that assists its member boards and jurisdictions in developing, implementing, and enforcing uniform standards for the purpose of protecting the public health.
